16083KH2E	83mm	with knob from the big side,	nickel	

\*Choose either round or oval knob shape with nickel finish

## Master Key

The one side or both sides Master Key is ideal for the simple and knob cylinders. Master Key is the solution when a number of cylinders must use one single key. Each door has its own key, although it can be opened with the Master Key as well. There is also the option for all the keys or just a number of them to open specific doors or just one of them, the main door for example.
